Personal Statement

As you can see, the growth of video game industry is increasing from the past decade. The number of people who play game is rising since nowadays, the accessibility is easier owing to many types of platform. But there is considered by some people that gaming solely provide negative impacts on the user. I totally disagree with it since if the player wisely plays the game, they could gain benefits and knowledge.

In my childhood, I had to use computer for school assignment. I found using a computer program was fun and interesting. At that time, I didn't know how those programs were created. Until I reach my senior high school, I had computer coding class that is where I began to study more about it. At the same time, I played many computer and console games and I gained a lot of knowledge and experiences such as problem-solving skill and historical information from them. I want to create a game like one of those amazing game, so I decide to research which university and program would enhance my skills and knowledge to reach my goal. Computer Innovation Engineering Program of King Mongkut's Institute of Technology Ladkrabang is one of my interested programs that I think would suitable for me.

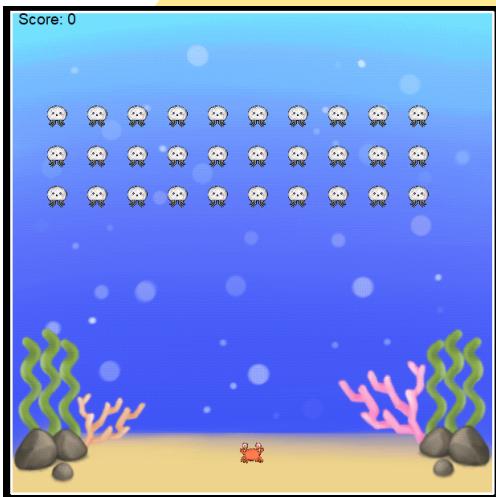

I want to create a game which people could gain knowledge and experience via meaningful content, while they are enjoying it. To prove that the games is not harmful as some people believe. To achieve my dream goal I have to develop my skills and knowledge that is the reason why I choose Computer Innovation Engineering Program of KMITL.

Activities and Achievements

Coding

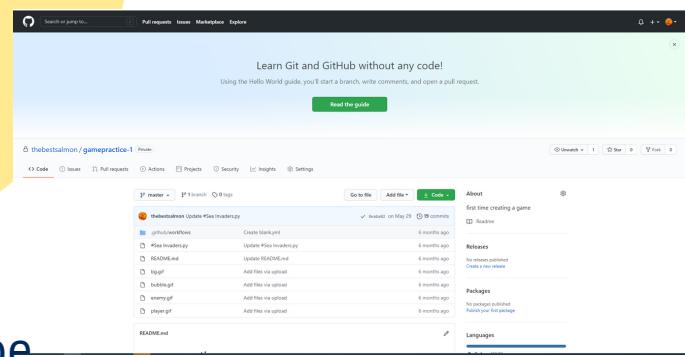

SEA INVADERS

```
space invaders.py x
Invalid Python interpreter selected for the project
1 # Sea Invaders
2 import ...
3
4
5
6
7
8 # Screen
9 wn = turtle.Screen()
10 wn.bgcolor("black")
11 wn.title("Sea Invaders")
12 wn.bgpic("bg.gif")
13 wn.tracer(0)
14
15
16 # Shapes
17 wn.register_shape("enemy.gif")
18 wn.register_shape("player.gif")
19 wn.register_shape("bubble.gif")
20
21 # border
22 border_pen = turtle.Turtle()
23 border_pen.speed(0)
24 border_pen.color("white")
25 border_pen.penup()
26 border_pen.setposition(-300, -300)
27 border_pen.pendown()
28 border_pen.pensize(3)
29 for side in range(4):
    border_pen.fd(600)
```

Posting on GitHub

- Learning coding via online sites and YouTube

Sports Day

Aerobic Team Leader

- Make the plan
- Assign the staff tasks
- Design the performance
- Remix the aerobic song

Won the 1st place prize

CLUB

- member of P.H. Club during year 9
- member of Mathematics Clinic during year 11

VOLUNTEER

- Planting mangrove forest
- Sweeping the temple grounds
- Folding the clothes for patients at Siriraj Hospital

EXCHANGE PROGRAM

**Albany Junior High School
18th April - 9th May 2015**

NEW ZEALAND

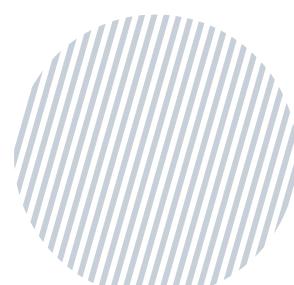

- At that time, I encountered language barrier since I was not fluent in English and I was very shy person. I have met many amazing people. This exchange program triggered me to embrace other point of view.

**BWK America Short Exchange Program
5th April - 28th April 2016**

AMERICA

- Through this program, I became more confident in myself and I am able to speak English without diffidence.

YFU Exchange Program 2018

Meijo University Senior High School

9th April - 21th December 2018

Super Science Class

Japan

- YFU selected 5 Thai students to be exchange students in Japan. YFU's purpose is to have intercultural understanding, life-long learning, global competencies, mutual respect, and social responsibility.
- I gained a lot of experience of culture as well as life skills. I have clearer understanding in the diversity of people. Even some aspects of Japanese people are different from us, there are some similarities that we share together.

Kendo
